Summary

With 6 years of experience in software engineering, I specialize in designing and implementing scalable software architectures that are easy to maintain and troubleshoot. Proven ability to architect and deliver performant, scalable solutions in fast-paced startup settings and complex enterprise ecosystems. My expertise spans front-end engineering using **JavaScript, React, Next.js, TypeScript, Redux, HTML, CSS**, and **cloud-based CI/CD pipelines** with solid of **system design, SDLC, and Agile methodologies.** Azure DevOps, and delivering secure, high-quality production code. Holds a **Bachelor's degree in computer Science.**

Experience

Fractal | Bengaluru | Apr 2024 - Present

Designation: Full stack Engineer (responsibilities)

- Hospital patient monitoring this product was developed from scratch using Next.js based web application for the **Philips enterprise HPM project**, facilitating AI-powered chat functionalities. Seamlessly integrated OpenAI to enhance conversational experiences, utilizing modern web technologies and robust data management practices.
- Implemented a topic-based conversational flow, allowing users to select predefined topics (e.g., Product Documents, Competition, Pre-sales, SOG) before initiating chat; integrated session history management in Cosmos DB to ensure context continuity across conversations.
- Integrated Azure Function Apps with the backend for LLM-powered data handling and automation.
- Set up the project from scratch, handling both frontend and backend (FastAPI, CosmosDB, Azure Function App) to build a scalable architecture for LLM-powered data processing.
- **At Bank of China Aviation,** Developed the product from scratch and implemented a feature to manage product specifications, including aircraft sales, leasing, airline details, and shareholder tracking across entities.
- Developed a wide range of **responsive and reusable UI components** from scratch—including navigation, date range picker, file upload, custom inputs, dropdowns, buttons, banners, carousel, checkboxes, toggles, radio buttons, popups, sliders, and tabs—each supporting custom functionalities to ensure scalability and consistency across products.
- **Technical stack & practices**: ReactJS, NextJs, Redux, Redux thunk, Redux saga, JavaScript, Python, FastAPI, TypeScript, SQL, MongoDB, GraphQL, HTML, Jest, RTL, Micro Frontend Architecture Code Splitting, Webpack, CI/CD Pipeline, CMS integration, Figma, Git, Agile (JIRA)

Prosperr.io | Bengaluru | Oct 2023 - Mar 2024

Designation: Frontend Engineer

- This product was developed from scratch and and here we are actively working on implementing a feature that captures and records conversations between financial advisors and users developed the functionality for seamless sharing of tax declaration documents within the platform, streamlining the financial planning process.
- Developed an employee management page from scratch to display employee lists in a dynamic, tabular format. Implemented **CRUD operations** (Create, Read, Update, Delete) along with **status management** for seamless data handling.

Embibe (Edtech) | Bengaluru | Sep 2020 - July 2023

Designation: Frontend Engineer

- Developed a wide range of responsive, reusable UI components from scratch such as navigation, date range picker, file upload, custom inputs, dropdowns, buttons, banners, carousel, checkboxes, toggles, radio buttons, popups, sliders, and tabs with **custom functionalities and Intersection Observer integration** to optimize performance and enhance user experience.
- Designed and developed a user-friendly cart system that allowed users to select, add, and remove items from their cart. Utilized Redux for state management to ensure real- time updates and smooth user interactions.
- Developed and integrated **autocomplete widgets** using **React.js, Redux, and React Router**, implementing real-time search suggestions with **debouncing and optimized rendering** to minimize API calls and deliver a smooth, responsive user experience.

Happay (Make My Trip) | Bengaluru | Jul 2019 - May 2020

Designation: Software Engineer

- Developed the product from scratch using **React.js, Redux, and React Router**, building multiple responsive components such as Landing Page, User Profile, User List, KYC, Expense List, Flexi Benefit, and Expense Details to deliver a seamless user experience.
- Implemented state management with Redux and seamless client-side routing with React Router, ensuring smooth navigation, scalable architecture, and consistent data flow across the application.

Education

Master of Computer Application | Computer Science | CSJM (UIET) Kanpur

Bachelor of Computer Application | Computer science | MDU Rohtak

Skills

Frontend: ReactJS, Component Optimization, NextJS, Redux thunk, Redux saga, JavaScript, TypeScript.

Backend: Python, FastAPI, PostgreSQL, SQL, Azure Portal, Function App, Redis, MongoDB.

DevOps / CI-CD: Azure DevOps, Pipelines, Build & Release, Git.

Methodologies: Agile/Scrum, SDLC, CI/CD, Secure Coding Practices.

Problem Solving: Data Structure & Algorithms (200+ problems)
